

SPIKE GARDEN LIGHT LINO

Garden spike lights can be used to create a focus light onto a specific feature such as a tree or sculpture. This can be used to extend the view down the garden and give depth to the space. Wider areas can be lit using spikes with a flood beam, rather than a spot.

Description

Model No. : R842903

Power : 3W

Driver : **DONE**

Input : AC110V-240V 50/60 HZ

Material : Die-cast Aluminum Body
Clear Tempered Glass
